**DEPARTMENT OF BIOTECHNOLOGY
INSTITUTE OF TECHNOLOGY**

BIOINNVIDA 2019

The Biotechnology department of the GITAM Institute of Technology is thrilled to organize the much anticipated Bioinnvida' 19, a two - day fest for young exuberant students. As the conventional sources of fuel are becoming scarce due to high demand, we believe that biofuel and bioenergy have high potential to establish energy balance with high security in biodegradable and recyclable alternatives. This year, we plan to explore the idea behind sustainable bio fuel and bio energy by conducting several workshops, games, expos and talks. The much awaited fest will be held on 22nd - 23rd of February and the students are assured of learning and gaining an enriching experience by taking part in workshops and talks delivered by the various experts.

About GITAM Institute Of Technology

GITAM Institute of Techonology was established in the year 1980. Over the years the institute has made its mark in the Engineering education in the country, as certified by various statutorybodies. The Institute has over 1000+ highly qualified, dedicated, and committed faculty who have made significant contributions at both the National and the International levels. The Institute provides high quality education to students in an environment conducive to learning.

Department of Biotechnology

The Department of Biotechnology was established in the year 2002 to train students for the needs of the emerging Biotechnology industry. The department offers B.Tech. (Biotechnology), M.Tech. (Biotechnology), M.Tech. (Food Processing Technology) and Ph.D. programmes. The curriculum of these programs has been designed and updated to train students in engineering skills relevant to Biotechnology based industries as well as the fundamentals of biological sciences, chemical engineering and computational sciences. The strong emphasis on fundamentals allows for the flexibility of the curriculum at advanced stages. Students choose advanced electives based on their interest and also the rapidly changing requirements of Biotechnology industry. Presently the department is headed by Prof. Sk. Khasim Beebi a dynamic person with vision.
